**MEMORANDUM IN SUPPORT OF MOTION TO DISMISS AND IN OPPOSITION TO
PLAINTIFFS' MOTION FOR A PRELIMINARY INJUNCTION**

INTRODUCTION

At the outset the entire proceedings that has been filed against the defendant is precocious since it is based on documents which cannot stand as the test of evidence. The present proceeding that was allegedly filed on 09/08/2016 against the defendant for seeking motion for preliminary injunction has been done without conducting a proper investigation. Infact the entire proceeding has been filed against this Defendant on weak grounds and without taking into contention the previous communications the litigating parties had with each other. On this basis it is needless to say that because of this baseless litigation the reputation of the Defendant has been irrapabilily damaged more particularly because of the victimizing attitude of FTC in giving the press release this Defendant is exploring the possibility of launching the defamation proceedings against FTC in a surficial capacity as well as the personal and employees in their individual capacity. The irresponsible act of FTC in giving a press release has affected the

present(1500+) as well as the past employees(1500+), 50000+ volunteer editors who have been contributing their efforts in making healthcare and scientific information open access along with authors and reviewers. Our client's modus operandi and intend to start the open access publications is clear and transparent and we have submitted the same to FTC and enclosing the same for your reference. Exhibit-1,1.1,1.2

Our client is been supported by 50000+ Editorial board members who serve on voluntary basis to disseminate the open access, and year on year this support is increasing progressively with which our client is able to grow from 10 journals in 2009 to 700 journals by 2016.

As the organization has become complex with the rapid growth our client is experiencing some of the technical issues at this initial stages. Usually, 99% of the issues get resolved at (contact us) stage and few unresolved cases being clarified/settled by CEO level (1%) and we believe interference of FTC is irrelevant in these matters.

As of now OMICS Group is large scholarly platform visited by 30+ million readers to its journals and conferences. With 700+ open access journals, OMICS Group is a fertile global forum for discussion and knowledge sharing and OMICS Journals only are able to attract more than 15 Million unique visitors across the globe. omicsonline.org, omicsgroup.org, these two sites are accounting for 40% journals out of 700 running by the publisher. Moreover, 70% of the visitors to the sites comprise researchers from USA, India, UK, Japan, Germany, Italy, Australia, Brazil and South Korea, which have been serving as a global hub for scientific research. Approximately, 25% of visitors are flocking from the USA alone. Our client is doing their best in making science Open access and most of the beneficiaries (users of open access literature) are from United States of America.

Google analytics reports. Exhibit 2

Our client has opened American bank accounts just to utilize the banking service as you can see Indian company registration certificate submitted to open the account in CITI bank Palo Alto.

At that time Dr. Srinu babu Gedela was pursuing his Post-doctoral at Stanford University, bank account was opened for the purpose of his accounting convenience but not to do the business in United States. Bank account was opened only in CITI bank as the correspondence of CITI bank India was already opened and this was opened in 2009 and closed in 2016. As the bank account is there in US the same bank account details were distributed among our client's customers and has taken Incorp services to support, and file the taxes accordingly.

For your information the plaintiff earning is less than \$250000 the same can be verified from IRS records:

YEAR	Taxable income/Net profit earned	Tax Paid	Net Profit After tax
2009	2,969	296	2,673
2010	7,537	753	6,784
2011	35,171	4,919	30,252
2012	58,486	10,649	47,837
2013	50,181	7,296	42,885
2014	45,169	6,569	38,600
2015	47900	6,524	41,376
2016	Operations closed and yet to finalize the financials		

Our client is also the victim of fake cheques distributed on behalf of our client's company M/S OMICS Publishing Group by unknown persons to unknown addresses. Our client got some losses because of which our client closed the accounting in the US, the same cases were addressed by FTC in their exhibits which are not related to us by any ways. Exhibit-3

Defendant is getting the appreciation and invitation letters from the mayors of all the major cities

across the world. Nobel laureates and well reputed scientists also attending our client's conferences to applaud our client's efforts to disseminate knowledge. More than 25000 well reputed scientists voluntarily supporting as organizing committee members to our client's conferences. Exhibit-4

The Defendants also presume that the other players in the market unable to compete with the Defendants have lobbied to impress FTC to file the present proceeding. The general market that the competitors of Defendant deal with is more than 500 Million dollars while the Defendant offers the same quality services at a fraction being less than 10 Million dollars which in itself speaks the bases of the allegation of lobbying and consequential filing of the present case. The competitors of the Defendant who are commercial subscription/pay access based publishers are gaining huge amounts while the Defendant is open access publisher promoting the dissemination of the scientific knowledge even though has an opportunity to make equal money along with its competitors.

As the defendant is a reputed scientific Publisher and conference organizer who is renowned across the globe for his principle of making "health care and scientific information open access". More than 1000 well reputed scientists who are serving as executive editors/editor-in-chiefs recommended our clients journals to be indexed in PubMed central the same is available at the Defendant's website and the portion is enclosed herewith for your information.

Exhibit-5, 5.1

The act of FTC amounts to an abuse of process of law as well as damage to the reputation of the defendant and his business as well. The entire proceeding has been filed based on baseless documents which are not only frivolous but are also unsustainable.

The Plaintiff failed to provide proper exhibits which the court could rely upon and draw strength

from pursue an action to move forward with the motion sought by the plaintiff.

In reply to that action, this Defendant is seeking for a dismissal of the motion of preliminary injunction, permanent injunction and the defendant here by is replying to the contentions and in support of which is producing the exhibits and is seeking for the dismissal of the motion of injunction. The perusal of grounds as well as documents show that the FTC has not made out any case much less prima facing case.

The Defendant is available on Skype for court as well as FTC

Skype id: omics.ceo

Please notify us at least 24 hours in advance by email ceo@omicsgroup.org

STATUTORY BACKGROUND

A. Legislative History of section 5 of FTC act.

Section 5 was enacted as part of a congressional plan to supplement the Sherman Act and make more effective its antitrust policy. Congress realized that, in practice, the Sherman Act was successfully employed to attack monopolies only after they had become an accomplished fact, and thus Congress turned its attention to halting violations of the act in their incipiency. In the report to the House on section 5 it was said, It is now generally recognized that the only effective means of establishing and maintaining a monopoly, where there is no control of a natural resource as [or?] of transportation, is the use of unfair competition. The most certain way to stop monopoly at the threshold is to prevent unfair competition. The fact that the congressional motive in enacting section 5 was to "stop monopoly at the threshold" has been reflected in subsequent developments, and has an important bearing on the substantive meaning to be ascribed to the terms of the Act.

While Congress was concerned with unfair competition primarily from the point of view of its effect on antitrust enforcement, section 5 was framed in very broad terms. This reflected Congress' desire not to restrict the Commission to a specific list of business practices, but to rely on a general provision condemning unfair competition. The managers of the House Bill made the point that, it is impossible to frame definitions which embrace all unfair practices. Whether competition is unfair or not generally depends upon the surrounding circumstances of the particular case. What is harmful under certain circumstances may be beneficial under different circumstances.

Congress thus decided to leave it to the Commission to determine what practices were unfair, "subject, of course, to review by the courts. It is clear that Congress laid the groundwork for application of section 5 across a wide spectrum of business activity. However, judicial reaction was apprehensive, and section 5 has never gained the full realization of its potential role.

STANDARD OF REVIEW

I. STANDARDS FOR A PRELIMINARY INJUNCTION

A preliminary injunction is an extraordinary and drastic remedy, one that should not be granted unless the movant, by a very clear showing, carries the burden of persuasion. (Moore v. Consolidated Edison Co. of New York, Inc., 409 F.3d 506, 510 (2d Cir. 2005) (quoting Mazurek v. Armstrong, 520 U.S. 968, 972 (1997)). The general standard for a party moving for a preliminary injunction requires the movant to establish (1) establishing irreparable harm, and (2) either (a) a likelihood of success on the merits of its claim, or (b) existence of a serious question going to the merits of its claim and a balance of hardships tipping decidedly in favor of the moving party. Beal v. Stern, 184 F.3d 117, 122 (2d Cir. 1999). While a moving

party will normally be permitted to use either prong of the second test establishing either a likelihood of success or the existence of a serious question going to the merits of its claim and a decisive tipping of the hardships in its favor, option (b) is unavailable when, as here, the injunction at issue stays. Able v. United States, 44 F.3d 128, 131-32 (2d Cir.1995). "It is inappropriate for this Court to substitute its own determination of the public interest for that arrived at by the political branches whether or not there may be doubt regarding its wisdom." Accordingly, since plaintiffs seek to enjoin defendants from enforcing provisions of a federal statute, plaintiffs.

II. STANDARDS FOR A MOTION TO DISMISS:

A court should dismiss a complaint for failure to state a claim upon which relief can be granted pursuant to Rule 12(b)(6) if "it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief." Harris v. City of New York, 186 F.3d 243, 247 (2d Cir.1999). While courts must accept all precisely worded factual allegations as true, legal conclusions or unsupported inferences or assumptions in a complaint, need not be accepted in the context of deciding a Rule 12 motion. See Smith v. Local 819 I.B.T. Pension Plan, 291 F.3d 236, 240 (2d Cir. 2002) ("[c]onclusory allegations or legal conclusions masquerading as factual conclusions will not suffice to prevent a motion to dismiss"); Oxford Asset Management, Ltd. v. Jaharis, 297 F.3d 1182, 1188 (11th Cir. 2002) ("conclusory allegations, unwarranted deductions of facts or legal conclusions masquerading as facts will not prevent dismissal"). It is lack of conclusive evidence and unwanted allegations masquerading as facts that cannot entitle the present Plaintiff to obtain preliminary injunction.

When considering a motion to dismiss under Rule 12(b)(1), the court must take all facts alleged in the complaint as true and draw all reasonable inferences in the favor of the plaintiff. Raila

v. United States, 355 F.3d 118, 119 (2d Cir. 2004). However, "[i]t is the affirmative burden of the party invoking [federal subject matter] jurisdiction to proffer the necessary factual position – not just an allegation in a complaint – to support jurisdiction." Juvenile Matters Trial Lawyers Ass'n v. Judicial Department, 363 F. Supp.2d 239, 243 (D. Conn. 2005) (quoting London v. Polishook, 189 F.3d 196, 199 (2d Cir. 1999)). The claim of Jurisdiction in the present proceeding by the Plaintiff is not correct as being in USA, since it is the revelation of the plaintiff by itself at Page 2 lines 25 to 27 of the memo in support of Preliminary Injunction that the place of business is in Kavuri Hills, Hyderabad, India.

ARGUMENT

I. THE PLAINTIFF'S FAILURE TO ESTABLISH ANY KIND OF EVIDENCE WHICH PROVES THE DEFENDANT IS GUILTY IN THIS CASE."

In their memorandum, plaintiffs tried to assert that the business practices of the Defendant are unfair and deceptive acts See Complaint, ¶ 1; Pl. Memo. at 1. On the other hand, they argue that the Defendants have maintained a substantial course of trade in so for affecting commerce, as "commerce" is defined in Section 4 of the FTC Act 15 U.S.C. § 44."

Both interpretations are incorrect and are based on misinterpretations drawn with the ignorance of the actual facts of the business of the Defendant. The exhibits which prove the facts in favor of the Defendants and disprove the allegations of the Plaintiff are enclosed herewith.

II. PLAINTIFFS HAVE NOT ESTABLISHED ANY IRREPARABLE HARM SUFFICIENT TO SUPPORT THEIR REQUEST FOR A PRELIMINARY INJUNCTION.

For all of the reasons previously stated, plaintiffs have demonstrated no likelihood of success on the merits of their claims. They are, therefore, not entitled to preliminary relief. In any event, plaintiffs have not borne their burden of demonstrating that they will suffer irreparable injury if a preliminary injunction is not granted. The Injunction that is being sought for is actually infructuous, since the Defendants are actually following the same.

Plaintiffs cite no cases to support that such substantive due process claims by their nature constitute irreparable injury. Indeed, they cannot. As this Court has noted, plaintiffs "must establish the existence of irreparable harm on their claims. While plaintiffs complain that the restrictions may impose some burdens, the circumstances are not analogous.

Accordingly, plaintiffs have failed to show any support for their claim of irreparable injury and on the other hand the issue of Jurisdiction and Sec 5 weight strongly in favor of the Defendants for non-grant of an Injunction.

CONCLUSION

For the above stated reasons, plaintiffs' motion for a preliminary injunction should be denied, and defendants' motion to dismiss should be granted.

Respectfully submitted,

Attorneys for Defendants

EXHIBIT-1,1.1

1
2 **Introduction and why OMICS started**

3
4 **Company origin**

5 OMICS origin itself witnesses the Company has started not for business, just to
6 make science "Open Access" and help the scholars all over the world. Dr
7 Srinubabu Gedela own bitter experiences to produce the required literature to his
8 research paper and to attend an international conference at Human Proteome
9 Organization, Seoul, Korea, where he received the Young Scientist Award
10 prompted him to begin an initiative that would free the scientific knowledge from
11 all barriers. Encouraged by his fellow scientist friends, Dr. Gedela started OMICS
12 International in the year 2007.

13
14 OMICS International is an amalgamation of Open Access Publications and
15 worldwide international science conferences and events. Established in the year
16 2007 with the sole aim of making the scientific and healthcare information "Open
17 Access". OMICS International publishes scholarly journals in all major disciplines
18 of Science, Engineering, Management and Medical journals. OMICS International
19 has been instrumental in taking the knowledge on Science & technology to the
20 doorsteps of ordinary men and women. Research Scholars, Students, Libraries,
21 Educational Institutions, Research centers and the industry are main stakeholders
22 that benefitted greatly from this knowledge dissemination. OMICS International
23 also organizes 3000+ annual International events (600 International conferences,,
24 1200 Workshops and 1200 symposiums) across the globe, where knowledge
25 transfer takes place through debates, round table discussions, poster presentations,
26 workshops, symposia and exhibitions.

27
28 As Dr. Gedela's initial interests were in the field of proteomics and diabetes he
29 named his organization as 'OMICS'. As he was well aware of the difficulties of his
30 fellow scientists in accessing the instant information and knowledge, he committed
31 himself to the mission of 'Open Access' to guarantee free and immediate access to
32 information for any academic or research requirement.

33 Today, OMICS International is an ever expanding publishing group that publishes
34 700 online open access journals in the fields of Clinical, Medical, Engineering &
35 technology, Management, and Life Sciences that publishes thousands of scientific
36 research articles annually.

37
38 **We are working to make Healthcare and scientific information**
39 **Open Access that is the reason we are able to get support from 5000**

1 **scientists as editorial board members and 25000 organizing**
2 **committee members. We are publishing nearly 70% article with**
3 **waivers and discounts.**

4
5 Dr. Gedela could transform the benefits of the economic liberalization in the world
6 to the young and budding science graduates out of colleges and universities by
7 providing employment to them. Around 1500+ post graduates are working for
8 OMICS International in various capacities for its journals and International
9 conferences at administrative, research, collaboration, event management, Journal
10 publication and so on.

11
12 **Dr. Gedela is happy as his open access-publishing platform**
13 **providing free scientific literature to 5 Million readers (online**
14 **visitors) from America and 20 Million readers from rest of the**
15 **world.**

16
17 Exclusive Poster presentations and 'Young Science Awards' in all OMICS
18 International conferences are meant to encourage the budding scientists across the
19 globe.

20
21
22 **Brief about Dr.Gedela**

23
24 **As an Entrepreneur**

25
26 Dr. Gedela is from a lower middle class family, his failure to access advanced
27 journals when he was a student in Visakhapatnam gave strong will to promote
28 open access journals and organize scientific conferences and symposiums.

29 **Encouraged by his fellow scientist friend's majority from Andhra**
30 **University and Stanford University where he completed his**
31 **Graduation and Post Doctorate, Dr. Gedela started OMICS**
32 **International in the year 2007.**

33
34 Dr.Gedela was quick in realizing the bitter truth that the job opportunities for the
35 life science graduates were not hard to come the moment they stepped out of the
36 university as neither aid nor infrastructure is forthcoming. He was quick in
37 grasping the fact that life sciences as a field was not well explored and linked to
38 industry requirements.

A Philanthropist

Moral support

In a bid to offer back what he gained from the society, Dr. Gedela supporting 7 villages in Srikakulam District of Andhra Pradesh. He is supporting in providing safe drinking water to Allenna, Burja, Kilentra, G B puram and its nearby villages where the contaminated water is resulting in dreadful 'Cancer'. He is also into promoting schools, healthcare and sanitation for the past seven years to these villages.

Educational Support

Education lays the foundation for the success of any society. Education is the torch bearer for any progress. Be it scientific development or technological advancement, the first step should be the school where we lay our first step towards knowledge acquisition.

OMICS Educational Society sets the curriculum, trains the human resources, provides technical assistance and works on capacity building through faculty development workshops to the teacher and the taught in schools that are already functioning at various levels. It strives to strengthen the pedagogy by supplementing audio-visual teaching learning equipment.

OMICS Educational Society made inroads into seven interior villages of Srikakulam District, where it has extended support to strengthen the primary and secondary education through his educational society providing assistance to 3000+ students from primary education to higher education.

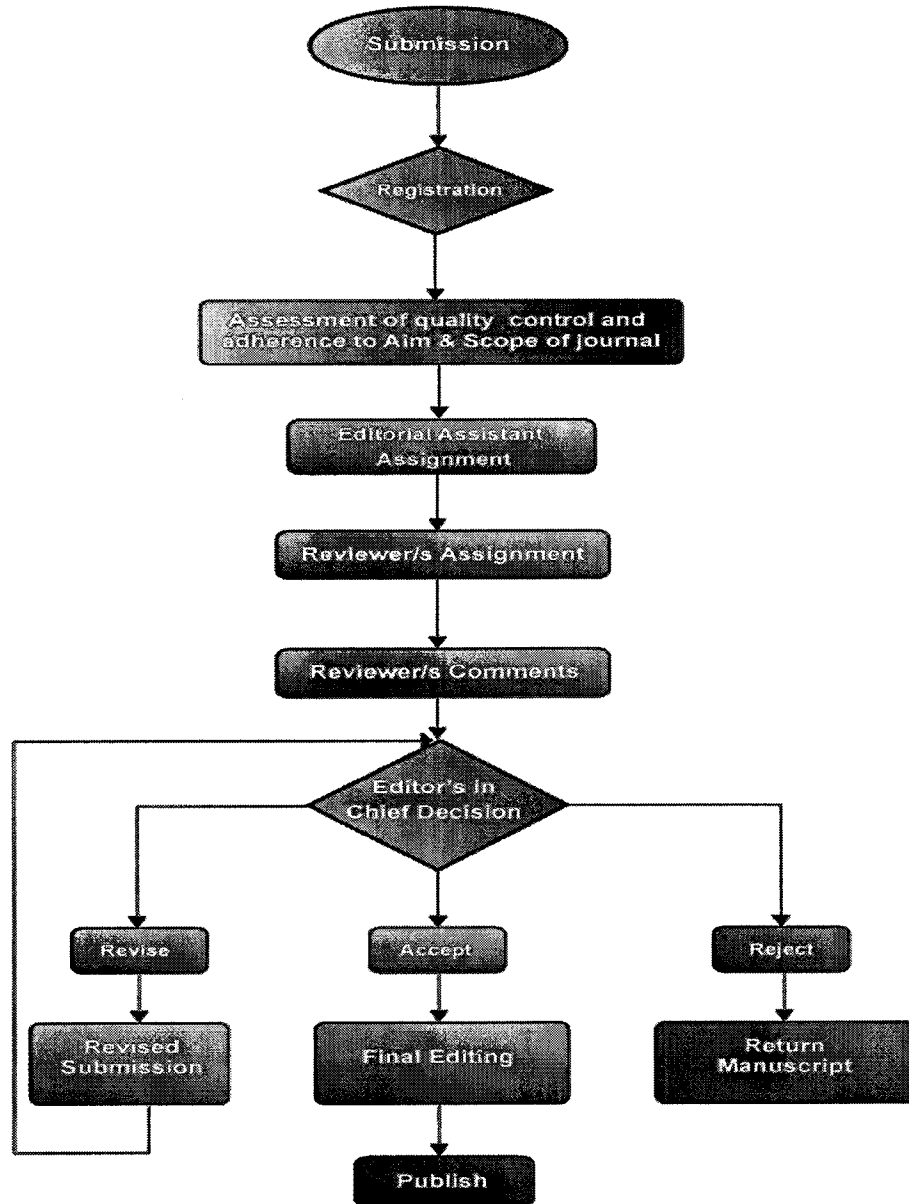

Journals modus operandi and processing

(Please browse URL for complete information: <http://www.omicsonline.org/peer-review-process.php>)

The entire process is being monitored by well qualified scientists designated as editor(s) and reviewers through a medium Editorial Manager System developed and supported by Aries Systems Corporation, USA. This Editorial Manager system was also adopted by major publishers like Nature, PLOS etc.

This entire process was clearly displayed on our website.

1

2

3

4

5

6

7

8

Peer review is the major quality maintenance measure for any academic journal. In this process, experts in the relevant fields analyze the scholarly work from every perspective, including its writing, the accuracy of its technical content, its documentation, and its impact on and significance to the discipline.

1 Reviewers play a pivotal role in scholarly publishing, and their valuable opinions
 2 certify the quality of the article under consideration. Peer review helps to ratify
 3 research, establishing a standard for evaluation within research communities.

4
 5 OMICS journals employ the peer review process in order to maintain academic
 6 standards and insure the validity of individual works submitted for publication. In
 7 addition, OMICS follows a single-blinded peer review process, to ensure impartial
 8 editorial decision making.

9
 10 Depending on reviewer commentary and recommendations, manuscripts may be
 11 sent back to authors for revision. After the assistant editor receives the revised
 12 manuscript, it is assigned to the reviewer(s) once again, for approval of changes.
 13 But the final decision to publish is made by the Editor-in-Chief.

14
 15 OMICS will grant a double-blinded peer-review process upon an author's request,
 16 and this requires the prior approval of the Editor-in-Chief.

17
 18 **Once the article was accepted we will do necessary HTML, PDF**
 19 **works and then only we will raise the invoice to the authors.**
 20 **Authors are not low qualified people they are all well respected**
 21 **scientists across the globe. Inspite of few comments made by**
 22 **competitive publishers or their associates we are getting good**
 23 **support from Authors because our Modus operandi is very clear**
 24 **and transparent.**

25
 26 **Modus operandi of conferences and processing**
 27

28 **OMICS is organizing conferences in 25 countries with support from**
 29 **25,000 Organizing committee members. Almost all the conferences**
 30 **are accredited by Continued Professional Development**
 31 **Accreditation (CPD) and/or Continued Education (CE) and**
 32 **Continued Medical Education (CME).**

33
 34 **Our conference registration fee is as less as \$50 which is lowest in**
 35 **the world when we compare registration fees of other conference**
 36 **organizers. Sometimes our registration is more when registrant**
 37 **opted for food and accommodation. We are providing platform for**

1 **scientist, students and graduates in different subjects and**
2 **disciplines. Please check online our conference attendee registration**
3 **fee even starts from \$50.**

4
5 **Each conference consists of 15-25 Organizing committee members**
6 **and 75-100 well qualified speakers. Most of the participants are also**
7 **well-qualified scientists with above age of 30 years.**

8
9 **The scientists/professionals who registered for the conference and**
10 **wish to cancel later, we will refund the amount as per our**
11 **cancellation policy.**

12 **<http://www.omicsonline.org/international-scientific-conferences/>**

13
14 Authorization Policy and registration guidelines were clearly mentioned at
15 registration page.

16 **<http://dentalsurgeons.dentalcongress.com/registration.php>**

17 **<http://dentalsurgeons.dentalcongress.com/speaker-guidelines.php>**

18 **<http://dentalsurgeons.dentalcongress.com/cancellation-policy.php>**

19 **Authorization Policy**

20 By registering for the conference you grant permission to Conferenceseries LLC to
21 photograph, film or record and use your name, likeness, image, voice and
22 comments and to publish, reproduce, exhibit, distribute, broadcast, edit and/or
23 digitize the resulting images and materials in publications, advertising materials, or
24 in any other form worldwide without compensation. Taking of photographs and/or
25 videotaping during any session is prohibited. Contact us for any queries.

26
27 Note: If the payment is processed through Credit/Debit Card, The Card statement
28 will be shown on the name of Conferenceseries LLC or its subsidiaries iMedPub
29 LLC or OMICS Group Inc., depending on the currency.

30 Here Conferences and Programs are announced to keep update our clients and to
31 bookmark their dates. However, Registrations are not allowed before 12 months of
32 the conference.

33
34 **So our Modus operandi is very clear and transparent accordingly we are**
35 **getting good support from all over the world because of that support only we**
36 **are growing.**

Exhibits:

Article Processing Charges:

Article processing charges are clearly displayed on the website. You can see on our websites and on all the journals where the information for authors has been displayed properly for example:

<http://www.omicsonline.org/instructionsforauthors-clinical-cellular-immunology-open-access.php> the charges for the article process has been very clearly mentioned in the place in the instruction for authors. Our client never request authors to pay the amount for the submitted articles. The invoices shall be raised once the article is accepted for publication.

Peer review:

We follow a single blind peer review process for most of our journals where author's details are revealed to the independent peer reviews, who are experts in the particular subject. On an average our peer review process requires 1-3 months. Once we receive the comments, Editors takes decision on the manuscript.

Usually the peer-review is done by the esteemed scholars from a post-doctoral to Professor Cadre, who work voluntarily and can contribute to the peer-review process based upon their subject expertise and interest. More information can be accessed through the following link.

<http://www.omicsonline.org/peer-review-process.php>

The entire process is being monitored by well qualified scientists designated as editor(s) and reviewers through a medium Editorial Manager System developed and supported by Aries Systems Corporation, USA. This Editorial Manager System was also adopted by major publishers like Nature, PLOS etc.

Impact factors:

Impact factors are one of the measures for the journal reputation, there are so many other metric/measure are there for journal credibility even most of the journals are not following Impact factors. For Example Cite Factor/ Global impact factor, Index Copernicus values, H Index, Journal Impact Factor etc., in this Journal Impact Factor is the trademark of OMICS Group (trade mark registered by OMICS

Group- Trade Mark registration certificate provided in (Exhibit-2) is the one. We are clearly mentioned that the journal impact factor achieved based on citation calculation which we clearly displayed on our website on each and every journal, similar criteria or other criteria is following by the few other publishers too. Elsevier follows h-index provided by Scopus; both the entities belong to single company Elsevier.

Similarly OMICS Journals following Index Copernicus Values (provided by Index Copernicus International)

<http://journals.indexcopernicus.com/page.php?page=3>) Journal Impact factor (provided by OMICS) and h-index (provided by Google Scholar, Scopus) as OMICS journals reputation metrics.

Impact Factor's criticism is clearly mentioned from public platforms like 29 Wikipedia. https://en.wikipedia.org/wiki/Impact_factor

We have never mentioned that the impact factor formulae derived is the Thompson's impact factor, we have arrived at this formulae based on the journal impact factor's formulae practiced by us solely. So this doesn't account to any kind of breach. There are other impact factors and journal metrics providers are available who are providing Impact Factors and other journal metrics like Index Copernicus values, h-index etc. Below are the providers who also follow Impact factor like metrics and their URL's are mentioned below:

<http://globalimpactfactor.com/journal-search/> 11

https://inis.iaea.org/search/search.aspx?orig_q=RN:45021442 12

<http://www.citefactor.org/> 13

<http://onljvetres.com/impact2007.htm> 14

<http://www.jifactor.com/> 15

<http://generalimpactfactor.com/> 16

<http://impactfactorservice.com/> 17

<http://www.uifactor.org/AboutUs.aspx> 18

<http://journals.indexcopernicus.com/page.php?page=3>

PubMed Indexing:

PubMed Indexing service is one of the major indexing's for medical journals only. There are so many other indexing services for other subjects like Chemical Abstracts, Scopus, EBSCO, Index Copernicus, CNKI and Ulrich etc. Yes, we agree that PubMed has notified us not to use PubMed's logo in erroneous manner. We are following their guidelines regarding usage of PubMed logo. We rectified the logos use and presently using as per PubMed guidelines at designated places. Perhaps, we do have some acquired journals, which are indexed in PubMed/Medline from other publishers. We used wordings for PubMed as they are included in the database. Moreover, we have thousands of articles submitted to PubMed Central. NLM catalogue listed hundreds of OMICS journals please browse following URLs for your clarification:

[//www.omicsonline.org/NIH-funded-articles.php](http://www.omicsonline.org/NIH-funded-articles.php)
<https://www.ncbi.nlm.nih.gov/nlmcatalog/?term=OMICS>

Some of the journals are partially indexed in PubMed based on the grant and few are completely indexed like "Indian Journal of Pharmaceutical Sciences" 78 years old well respected journal.

PubMed also reported that we have used NIH employees' names without their consent, when we supplied the required information with proofs of respective NIH scientist's agreement and email proofs then they realized the truth and cooperating with us for listing of journals and articles in PubMed. These replies are also available in online platforms (links provided for your information).

For your clarification we are attaching all those communication with this 30 response. Provided in Exhibit-1.

Conferences:

OCM (Organizing committee members)- All the OCM are well respected scientists in their field from all over the world. We have organizing committee members who host the events that are held at different places all over the world. All the OCM's who are on the board are working on volunteer basis. They have joined and accepted to be on board with their full consent. We have email communications with all the members who have accepted as chairs in our events. 80% of our Organizing Committee members are from Developed countries and 20% from developing countries. Many researchers around the world are supporting OMICS conferences.

All our scientific conferences are doing great contribution to the society. We are conducting conferences to disseminate the scientific community. Our International Conferences work with the slogan: Meet, learn and explore. The expenses incurred for organizing conferences are very high there are certain basic requirements we follow to provide quality services. We also provide discounts to many participants.

Each conference consists of 15-25 Organizing committee members and 75-100 well qualified speakers. Most of the participants are also well-qualified scientists with above age of 30 years.

OMICS is organizing conferences in 25 countries like United States. Our conference registration fee is as less as \$50 which is lowest in the world when we compare registration fees of other conference organizers. Sometimes our registration is more when registrant opted for food and accommodation. We are providing platform for scientist, students and graduates in different subjects and disciplines. Please check online our conference attendee registration fee even starts from \$50.

Attendees for Conferences:

OMICS invites the audience from all parts of the world. Scientific researchers attend the events to receive advance information and to explore their opportunity in their research areas. OMICS is creating excellent opportunity for the business professionals creating a B2B platform to market their products and services, providing CME and CPD Certificates to Medical Professionals and Physicians.

For your information, OMICS is organizing the conferences in USA like other countries with the support from the scientific committees and other reputed associations. OMICS neither have office in the USA nor are conducting operations from the United States for our conferences. Most of the Mayors of the respective cities also have extended their support for our events (Mayor and Governors appreciation letter are enclosed in Exhibit.4).

Through our conferences United States is getting major contribution of the revenues through the tourism and other ways every year, and such 90% of participants are from international countries, that's why we are getting letters from the mayors of respective cities appreciating our efforts.

Article Withdrawal Charges:

Withdrawal related APCs are only requested when an article passes through the processing. Since the publisher has certain expenditure to process the articles, authors are requested to pay to cover the expenses that are incurred by Publisher. Processing charges for withdrawals have been displayed very clearly on our website. (<http://www.omicsonline.org/article-processing-charges.php>)

Out of this, our client is providing 40% waivers and 30% discounts from total published/processed articles on the mentioned rates at our websites. That is the reason we are getting repeated and more number of article submissions from authors.

EXHIBIT-2

As of now OMICS Group is getting 30+ million readers to its journals and conferences. With 700+ open access journals, OMICS Group is a fertile global forum for discussion and knowledge sharing and OMICS Journals are attracting more than 15 Million unique visitors across the globe. omicsonline.org, omicsgroup.org, these two sites are accounting for 40% journals out of 700 running by the publisher. Moreover, 70% of the visitors to the sites comprise researchers from USA, India, UK, Japan, Germany, Italy, Australia, Brazil and South Korea, which have been serving as a global hub for scientific research. Approximately, 25% of visitors are flocking from the USA alone. Our client is doing their best in making science Open access and most of the beneficiaries (users of open access literature) are from United States of America. Exhibits 1, 2,3,4 Google analytics reports.

Increasing Fraudulent Activities

To: [REDACTED] <[REDACTED]>, [REDACTED] <[REDACTED]>, [REDACTED] <[REDACTED]>, "[REDACTED]" <[REDACTED]>, "<[REDACTED]>" <[REDACTED]>, Srinubabu Gedela <[REDACTED]>

Another \$29034 unknown debit was happened through ACH. Someone authorized my account for Chase ACH debits.

I don't know what is happening how will get back this money.

STATEMENT OF UNAUTHORIZED ACH (ELECTRONIC) DEBIT

I, **OMICS PUBLISHING GROUP**, state that I have examined the statement or other notification received from Citibank indicating that an ACH debit entry was charged to my Account Number 00000000203273081.

I understand that an unauthorized debit means an electronic funds transfer from my account either: 1) initiated by a person who was not authorized by me to initiate the transfer, or 2) if authorized, is in an amount greater than that which was authorized, or 3) results in a debit to my account earlier than authorized by me.

I have listed the unauthorized transactions as follows:

Date of Transaction	Merchant Name	Amount
06/09/2016	THIRDFEDERALS&L RETRY PYMT0609	\$5,000.00

Please include any additional transactions on an attached sheet of paper and initial here _____
Please complete a separate statement for each account number.

I further depose and say that (check one)

- () I did not authorize, and have not ever authorized THIRDFEDERALS&L RETRY PYMT0609, to originate one or more ACH entries to debit funds from my account at Citibank.
- () I authorized THIRDFEDERALS&L RETRY PYMT0609 to originate one or more ACH entries to debit funds from my account but on 2016-07-01T00:00:00, I revoked that authorization by notifying in manner specified in the authorization.
- () I authorized THIRDFEDERALS&L RETRY PYMT0609 to originate one or more ACH entries to debit funds from my account at Citibank but,
- () The amount debited exceeds the amount I authorized to be debited. The amount I authorized is \$_____.
- () The debit to my account was made on a date earlier than the date on which I authorized the debit to occur. I authorized the debit to my account on or no earlier than 2016-07-01T00:00:00.

I further state that the debit transaction was not originated with fraudulent intent by me or any person acting in concert with me, and that the signature below is my own proper signature.

I certify under penalty of perjury that the foregoing is true and correct.

Srinubabu Gedela <[REDACTED]>

Notification Regarding closing of Bank accounts

Srinubabu Gedela <[REDACTED]>

To: "[REDACTED]" <[REDACTED]>

Cc: "[REDACTED]" <[REDACTED]>

Dear Doris & Aileen,

We had good banking experience with Citibank Palo Alto. Previously we had an experience of fraud checks, recently these cases were increased. As previously communicated we got severe losses for the same. We would like to close our accounting in US for the same reason. We had an excellent banking from last seven years with Citibank N.A. Palo Alto.

We will close the accounting for OMICS Publishing Group, OMICS Group Inc, iMedPub llc, Conference Series llc. In US we did not have any physical office we opened bank account just for ease of online banking service.

Sincerely,
Dr Srinubabu

[REDACTED] <[REDACTED]> wrote:

Hi Mr. Gedela,

It took me a little longer to find all the answers because I had to contact different departments.

1. ACH and check fraud filed on 07/01/16 – resolved – pending deposit in your account. The case can take up to 45 days. (acct. 081)
2. Scam wire: after multiple requests, the receiving bank informed us that they received the funds and did not have a response from their customer. Citibank has closed the case and advises you to get legal advice. (acct. 017)
3. I filed again the investigation for the 3 checks that cleared account xxx081 on 7/15/16. I will attach the Affidavit of Forgery on my next email because I need to send it secure (a password will be sent to you separately). Please sign the document and have your signature notarized by a US notary and send it to the below address within 10 business days:

Incident Reporting Unit

PO Box 769027-9027

San Antonio TX 78245.

4. If you need to transfer funds again from account xx081 to another account you may call customer service and request "a real time unblock". This keeps the account blocked but will allow you to do a transfer within 24 hours. This way I do not need to unblock the account which exposes it to fraud.

[REDACTED]
Gmail - Notification Regarding closing of Bank accounts

5. Mr. Gedela, it is important that you open a new account and close this one because it has been compromised. In the future, Citibank will not process any more claims from an account that has been compromised. Please contact Aileen for the new account.

Thank you for banking with Citibank,

ATLANTA, GEORGIA 30335-0300

TEL (404) 330-6100

December 7, 2015

Greetings:

As Mayor of the City of Atlanta, it is my pleasure to welcome OMICS Group International and the attendees of the *5th World Congress on Virology*.

This year's meeting brings together more than 300 attendees from all over the country to participate in events and sessions that further their development in the field of Virology. I salute the attendees of the *5th World Congress on Virology* for working diligently to be at the forefront of their profession. I am confident this meeting will provide your members with an important forum to network, empower and innovate.

While in our city, I encourage attendees to explore the many attractions Atlanta has to offer including: the Dr. Martin L. King Jr. Center, the Georgia Aquarium, the World of Coca-Cola, CNN Center, Centennial Olympic Park, Woodruff Arts Center, Atlanta Botanical Garden, Children's Museum of Atlanta, the National Center for Civil and Human Rights, and many more. We invite you to share in our Southern hospitality, sample cuisine at our many fine restaurants and enjoy the rich and diverse heritage of our city.

On behalf of the people of Atlanta, I wish all of the participants an exciting event.

Sincerely,

A handwritten signature in black ink, appearing to read "Kasim Reed". The signature is fluid and stylized, with a large, sweeping flourish at the end.

Dear Friends,

It is my distinct honor to welcome to you to the 11th Global Summit on Food and Beverages and to the great state of Nevada. This event couldn't be held in a more fitting city than Las Vegas, which uniquely embodies the heart and spirit of the food and beverage industry.

Here in Nevada, we take great pride in our prestigious industry. Our university system offers degrees in this industry which are of some of the most prestigious programs in the world. Food and beverage is the largest manufacturing sector in America. It is quite clear from the caliber of the leadership and attendees at this event that this industry holds invaluable assets as well. The hard work and dedication each and every one of you put into your careers is evident, and greatly respected by those who benefit from your services.

I wish you unparalleled success at this annual conference, and I encourage all of you to experience everything our great state has to offer. Thank you for visiting Las Vegas, and thank you for making this event a tremendous success.

Best Regards,

A handwritten signature in black ink, appearing to read "Mark A. Hutchison", is written over a circular stamp or seal.

Mark A. Hutchison
Lieutenant Governor
State of Nevada

MAYOR OF LONDON

Dear Delegates

As Mayor of London I am delighted to welcome you to the 5th World Congress on Neurology and Therapeutics which is taking place in London from 14-16 March 2016, organised by OMICS International.

Neurological disorders including dementia will undoubtedly be one of the most significant challenges in the 21st century and I am pleased that we are hosting such a gathering of eminent experts from London and across the globe at this important event. London has a long and proud history of scientific and medical research and the conference will give you an excellent opportunity to network with London's world class leaders in this field.

While you are here I would also recommend you take in some of London's rich and varied cultural attractions – galleries, museums, music and theatre.

I hope that the Conference is a fantastic success and would like to take this opportunity to extend my warmest good wishes to all connected with the 5th World Congress on Neurology and Therapeutics.

Yours sincerely

A handwritten signature in black ink, appearing to be 'Boris Johnson', with a long horizontal line extending to the right.

Boris Johnson
Mayor of London

City of Phoenix

OFFICE OF THE MAYOR

December 7, 2015

Greetings!

As Mayor of Phoenix, I take great pride in welcoming all the attendees of the 2nd International Conference on Parkinson's Disease and Movement Disorders. Parkinson's is one of the most common neurological disorders, impacting 15-20 people out of every 100,000. The number may seem small, but the disease has an immense impact on these families, with annual cost above \$10,000 per patient.

Fortunately, there are many people working to fight the disease. The National Institute of Neurological Disorders and Stroke awarded \$90 million to Parkinson's disorder research, supported by the National Institute of Health. With approximately 500 neurologists, psychiatrists and neurosurgeons in Phoenix alone dedicated to researching and fighting Parkinson's disease, Phoenix is proud to be part of the solution.

On behalf of the residents of Phoenix, I welcome you to our city, and wish you a successful conference.

Sincerely yours,

A handwritten signature in black ink that reads "Greg Stanton". The signature is fluid and cursive, with the first and last names being clearly legible.

Greg Stanton
Mayor

11TH GLOBAL SUMMIT ON FOOD & BEVERAGES
SEPTEMBER 22-24, 2016
LAS VEGAS, NEVADA

Dear Attendees,

Welcome to America's most dynamic city - Las Vegas! You could not have chosen a better place to hold your summit in, and I am convinced that once you get a taste of what Las Vegas has to offer, you will definitely be back. As the Mayor of this great City, I am delighted to tell you why Las Vegas is *the* place to live, work and play!

Las Vegas continues to capture the world's imagination as the City where anything is possible. With world-class hotels, award-winning restaurants, luxurious spas, fantastic shopping, the finest golf courses and spectacular entertainment, Las Vegas remains one of the most electrifying destinations in the world.

While attending the summit, it is my hope that you will have each chance to explore Downtown Las Vegas, a area of our City that is undergoing a dramatic renaissance. It is evolving into a vibrant place for living, working, entertainment and the arts. Downtown Las Vegas is comprised of an enticing mix that includes:

- The neon-drenched excitement of the Fremont Street Experience, visited by over 21 million people each year.
- Multi-million dollar casino and hotel renovations and expansions.
- Fremont East Entertainment District featuring trendy new gathering places for dining, dancing, cocktails and enjoyment.
- An emerging eclectic mix of live-in artists and galleries known as the 18b Arts District.
- The World Market Center, a state-of-the-art home furnishings trade show complex with over 5 million square feet, has merged with another furniture complex in North Carolina and will now be called the International Market Center. The facilities in Las Vegas and North Carolina encompass 13 buildings, with 10.6 million square feet of furniture showrooms.
- Symphony Park, a phenomenal 61-acre planned development anchored by two key projects, the Cleveland Clinic Lou Ruvo Center for Brain Health, designed by renowned architect Frank Gehry, and The Smith Center for the Performing Arts, Las Vegas' first world-class performing arts facility. Symphony Park will also be the planned future home of The Charlie Palmer, a luxury boutique business hotel; a first-class casino/hotel with significant retail space; abundant street-sideretail offerings; a two-acre park; and an estimated 1000 urban style residences.
- A collection of world-class museums including the Neon Museum Boneyard, which houses over 100 donated and rescued Las Vegas signs that date from the late 1930s through the early 1990s; The Mob Museum, which provides a fascinating glimpse into our City's history and Discovery Children's Museum in Symphony Park, among others.

Again, welcome to fabulous Las Vegas! Best wishes for an enjoyable stay in our fine City. Sincerely,

Carolyn Goodman

Global Food Safety Conference - 2016

Welcome Message

26 February 2016

Dear Colleagues,

I would like to congratulate OMICS International (Conference Series LLC) for organising the 5th Global Food Safety Conference from 05-07 December 2016 in San Antonio, USA.

Global Food Safety-2016, with the mission of promoting research in all aspects of basic and applied food safety and hygiene, will bring together experts from the academia, national laboratories and the industry from over 25 countries to deliberate on the theme: "Addressing current issues and fostering advances in Global Food Safety World".

Members of the organizing committee of the Global Food Safety conference have exerted their utmost effort to prepare for the conference and to provide the ideal platform for in-depth analyses and wide ranging discussions on relevant food security factors. We therefore await your active participation in Global Food Safety-2016.

San Antonio is quite possibly Texas's most beautiful and atmospheric city and arguably the number one tourist destination in the State. You will have the opportunity to experience the many sights and sounds and smells that the city is renowned for.

We look forward to welcoming you to San Antonio, USA.

Finally, I wish to express my gratitude to all delegates and observers for your full cooperation and contribution to the 5th Global Food Safety Conference.

Thank you.

John Agyekum Kufuor

Letter of Consent

I hereby express my great interest in continued service in Journal of Anaplastology as an Editor. I further give my consent to disclose by the Journal my affiliation and contact information. I do not have any conflict of interest, which would interfere with this important service for science, medicine, and technology communities.

I strongly recommend this journal to be indexed in PubMed Central. Journal staff and editorial board members have worked very hard for the journal to establish its high professional standing.

Sincerely,

A handwritten signature in black ink, consisting of a large, stylized 'C' followed by a smaller 'S' and a period.

Dear Sir or Madame:

It is with great pleasure that I write this letter to endorse the addition of the *Journal of AIDS & Clinical Research* into the Pubmed index. As an Editorial Board Member, I am extremely proud of our multidisciplinary journal that aims to inform a broad audience of clinicians, researchers, academics, students and the lay community about the latest research on HIV/AIDS. Our journal includes findings in the areas of social/behavioral, clinical and basic sciences.

Through original articles, review articles, case reports, and short communications, the *Journal of AIDS & Clinical Research* is able to publish the most innovative, complete and reliable discoveries and current developments in the field of HIV/AIDS. Our rigorous peer review process ensures that the research is sound and will make a significant contribution to the literature. Importantly, the *Journal of AIDS & Clinical Research* is an Open Access journal. Thus, our articles are freely available online without any restrictions or any other subscriptions to researchers worldwide.

In conclusion, the editorial board members and journal staff have worked very hard for the journal to establish its high professional standing and there by recommending this journal to be indexed in PubMed. Please do not hesitate to contact me if you need any further information.

Sincerely,

A handwritten signature in cursive script that reads "John K. Williams".

Letter of Recommendation

Dear ladies and gentlemen,

over the last years our research group has published several papers in the Journal of Clinical & Experimental Ophthalmology, some of which have been highly cited, which confirms the quality of importance of this journal.

I strongly recommend the Journal of Clinical & Experimental Ophthalmology to be indexed in PubMed Central. The Journal staff and editorial board members have worked very hard for the journal to establish its high professional standing.

Re: Letter of Recommendation to get Biochemistry & Pharmacology: Open Access indexed in Pub med.

Dear Sir/Madame,

I would like to express my strong recommendation and my complete support for Biochemistry & Pharmacology: Open Access to be indexed in PubMed. My knowledge of this Journal, as well as my exceptionally high regard for its scientific potential, stems from my direct collaboration as an Editor with Biochemistry & Pharmacology and observation of the remarkable work that the editorial board and staff is conducting to make of this Journal an attractive avenue to report original and high quality research.

As for my qualifications to provide this recommendation, I am currently a Research Associate at the Department of Biochemistry and Molecular Biology at the University of Maryland School of Medicine. I hold a MD, and a PhD degree in Neurophysiology. I have 11 years of scientific research experience in the fields of neuronal and muscle electrophysiology as well as in the study of structure and function of calcium channels. My research has been focused in understand the molecular mechanisms underlying neuronal and skeletal muscle calcium signaling. I have published 21 articles in prestigious peer-reviewed journals, such as Journal of Neuroscience, American Journal of physiology, Cell Calcium, and European Journal of Physiology and the Journal of Clinical Investigation. I am member of scientific societies including the Biophysical Society and the American Association for the Advancement of Science. I am also heavily involved in the education and training of under/graduate students and postdoctoral scientists. Therefore, I feel that I qualify to evaluate and recommend Biochemistry & Pharmacology's capabilities and its potential in the scientific field. In summary, I highly and without reservations recommend this Journal to be indexed in PubMed.

Sincerely yours,

A handwritten signature in black ink, appearing to read "E.O. Hernandez-Ochoa".

RECOMMENDATION LETTER

Herewith, I confirm that Biochemistry & Pharmacology Open Access Journal is an Pharmaceutical Sciences Journals from the OMICS Group dealing with printing and publishing papers that includes a generously range of fields connected with fundamental, experimental and clinical aspects of Biochemistry and Pharmacology as core biomedical disciplines. As such Biochemistry & Pharmacology Open Access is becoming a open platform for confronting ideas and research results without any restriction.

The journal select, through a high quality review process, original articles, review articles, case reports, short communications, in all areas of the above mentioned field making them freely available through online in a short time interval.

A very professional team of editors are managing the hole process of submission, review, revise, and publish.

The scientific content of the journal become more and more valuable and important by this design of a fair and unobstructed publishing policy.

Considering all this qualities, so promptly consolidated, I strongly recommend this journal to be indexed in PubMed.

Re: Recommendation letter for the Journal of AIDS & Clinical Research to be indexed in PubMed

To Whom It May Concern:

Dear Sir/Madam,

I am writing to strongly recommend the Journal of AIDS & Clinical Research (JACR) to be indexed in PubMed Central. JACR is a multidisciplinary journal that aims to publish most complete and reliable source of information on the discoveries and current developments in HIV/AIDS related research.

I have been serving as an Editor for this Journal from its first published issue in 2010, and have seen the projectiles of the increasing number of high-quality manuscripts the Journal has received and the increasing number of citations on the papers that the Journal has published in the past years. As an epidemiologist with a decade of experiences on HIV/AIDS research and with experiences of serving as a reviewer for >15 journals including AIDS, JAMA, Plos One, I can vouch on the strictness of manuscript review by the Journal and the high quality of the papers that this Journal has published.

Journal staff and editorial board members have worked and will continue to work very hard for the journal to establish its high professional standing. The Index of the Journal by PubMed Central will make the high quality of papers in this Journal even more widely accessible to the global researchers.

Sincerely yours,

A handwritten signature in black ink, appearing to read 'Han-Zhu Qian'.

Han-Zhu Qian, M.D., Ph.D.
Assistant Professor of Medicine

July 10, 2013

National Library of Medicine
Building 38A - Room 4N-419
8600 Rockville Pike
Bethesda, MD U.S.A. 20894

To Whom It May Concern,

I am writing in support of the Journal of Autacoids for inclusion in PubMed Central's indexing system of medical journals. Although relatively young in years, the journal staff and the editorial board members of this online access journal have worked tirelessly to establish the journal's high professional standing by regularly releasing published articles that are on par or surpass articles in journals that PubMed Central currently indexes. I believe that indexing by the National Library of Medicine's PubMed Central would further enhance the quality and quantity of manuscripts submitted for publication to this journal. Therefore, I would strongly recommend that the Journal of Autacoids be indexed in the National Library of Medicine's PubMed Central.

Sincerely,

A handwritten signature in black ink, appearing to read "Henry E. Young", written over a horizontal line.

07/19/2013

To whom it may concern;

I am writing a recommendation letter for the Journal of Alcoholism & Drug Dependence to be indexed in PubMed. The Journal of Alcoholism & Drug Dependence publishes papers on psychological and sociological aspects of alcohol and drugs, and their effects, including biomedical, biochemical, pharmacological, physiological, behavioral actions and clinical research in humans. The journal includes a wide range of fields in its discipline to create a platform for the authors to make their contribution towards the journal and the editorial office promises a peer review process for the submitted manuscripts for the quality of publishing. The journal is an Open Access journal and aims to publish most complete and reliable source of information on the discoveries and current developments in the mode of original articles, review articles, case reports, short communications, etc. in all areas of the field and making them freely available through online without any restrictions or any other subscriptions to researchers worldwide. The journal is using Editorial Tracking System for quality in review process. Editorial Tracking is an online manuscript submission, review and tracking systems. Review processing is performed by the editorial board members of journal or outside experts; at least two independent reviewers approval followed by editor approval is required for acceptance of any citable manuscript.

I strongly recommend this journal to be indexed in PubMed.

Sincerely,

A handwritten signature in black ink, reading "Takato Hiranita".

DEPARTMENT OF NEUROLOGY

UNIVERSITY OF MARYLAND
SCHOOL OF MEDICINE

July 22, 2013

To Whom it might be concerned,

With greatest pleasure I am writing this letter on behalf of Journal of Clinical & Cellular Immunology, who is applying to be indexed in PubMed Central. I have been a reviewer for this journal and a member of the Editorial Board for more then 4 years, during which time I reviewed and edited manuscripts and I was able to experience first hand the review process.

To introduce myself, I am a Professor of Neurology at the University of Maryland, School of Medicine. I have been a faculty member at University of Maryland for 19 years, and I am an expert in multiple sclerosis. During this time I was principal investigator of National Institutes of Health, Veterans Administration and Multiple Sclerosis Society funded research projects on multiple sclerosis. I was also an associate editor for Journal of Immunology and editorial board member for Journal of Neuroimmunology.

Based on my previous experience and that of working with the Journal of Clinical & Cellular Immunology I strongly recommend the Journal of Clinical & Cellular Immunology to be indexed in PubMed Central. I have to say that the Journal staff and editorial board members have worked very hard for the journal to establish its high professional standing.

I have absolutely no doubt that journal will continue on the same path and will become an important journal in the field of Immunology. I strongly recommend the journal as an excellent candidate to be indexed in PubMed.

Please do not hesitate to contact me if you need further information's.

Sincerely yours,

Horea Rus, M.D., PhD
Professor of Neurology

Recommendation letter for the Journal of AIDS & Clinical Research to be indexed in PubMed

To Whom It May Concern:

Dear Sir/Madam,

Following my earlier letter sent to you on 10 July 2013 regarding this Journal, I would like to mention that I became its Editor-in-Chief at the beginning of 2011. The Journal of AIDS and Clinical Research (JACR) covers an extremely wide range of scientific and clinical issues in the field of HIV and AIDS and publishes original articles, reviews, case reports, short communications, editorials, as well as special issues devoted to important current aspects of the AIDS epidemic.

I am currently also the Editor-in-Chief of ARCHIVES OF VIROLOGY (since 1999) and JOURNAL OF MOLECULAR RECOGNITION (since 1999), an Executive Editor of ANALYTICAL BIOCHEMISTRY (since 1994), an Associate Editor of ADVANCES IN VIRUS RESEARCH (since 1985), of FRONTIERS IN IMMUNOTHERAPIES AND VACCINES (since 2012), of JOURNAL OF IMMUNOLOGICAL METHODS (since 1994), of ISRN IMMUNOLOGY (since 2011) and of BIONOMINA (since 2011).

I am therefore well acquainted with the process of peer-reviewing in use by the major publishers of scientific journals (Elsevier, Wiley, Springer, Academic Press) and can vouch that the editorial board of JACR carries out a reviewing process of high quality.

The unofficial 2012 impact factor of the Journal was 6,83. This figure was established by dividing the number of articles published in 2010 and 2011, and cited in 2012, based on a search of the Google Scholar Citation Index Database, by the number of articles published in 2010 and 2011. The Index Copernicus Value of the Journal was 5,58.

I have therefore no hesitation to strongly recommend that the Journal of AIDS and Clinical Research be indexed in PubMed Central.

Yours sincerely,

Marc H V Van Regenmortel,
Emeritus CNRS Research Director

July 15, 2013

To Whom It May Concern:

I strongly recommend that the Journal of Community Medicine & Health Education be indexed in PubMed Central.

In my experience with the Journal staff, I have found them to be professional and hard working. The editorial board provided reviewers for the manuscript that I submitted that were helpful and supportive. Overall in my experience those associated with the Journal of Community Medicine & Health Education have developed a professional product that disseminates health research in an open and equitable way. PubMed Central indexing would expand the reach and impact of the research in the Journal and would continue to increase the quality of the submissions. Overall I feel that this would be a benefit for the research community at large.

Letter of Recommendation

I hereby express my great interest in continued service in the Journal of Clinical & Cellular Immunology as an Editor. I further give my consent to disclose by the Journal my affiliation and contact information. I do not have any conflict of interest, which would interfere with this important service for science, medicine, and technology communities.

I strongly recommend this journal to be indexed in PubMed Central. Journal staff and editorial board members have worked very hard for the journal to establish its high professional standing.

Sincerely,

Pere Santamaria, MD, PhD
Editorial Board Member

Subject: Recommend the Journal of Autacoids to be indexed in PubMed Central

Dear Committee:

I strongly recommend the Journal of Autacoids to be indexed in PubMed Central. The Journal staff and editorial board members have worked very hard for the journal to establish its high professional standing.

The journal constantly published high quality research / review articles and the quality surpassed the publications in comparative journals with high impact factor. I strongly endorse this journal. Please let me know with questions.

Sincerely, 

Pradeep K. Karla, Ph.D.

Subject: Journal of Community Medicine and Health Education

Dear Sir/Madam

I am writing you to in my capacity as an editorial board member of the Journal of Community Medicine and Health Education. I have been working with the Journal from its inception and am well aware about its regular release of issues and the quality of manuscripts that have published so far. The peer review process of the journal has been undertaking by highly qualified experts in the field and the time frame of publications of the articles submitted in the journal is much faster compared to many international peer reviewed journals. I understand the journal publishing committee is submitting an application for indexing of the journal in PMC and I support their application.

I strongly recommend that the Journal Community Medicine and Health Education to be indexed in PubMed Central. The Journal staff and the editorial board members have been working hard and efficiently for the journal to establish its high professional standing.

Should you have any query about the journal quality and its publications please do not hesitate to contact me via email. Thank you in anticipation.

Yours sincerely,

GEORGETOWN UNIVERSITY MEDICAL CENTER

Re.: Application for PubMed Indexing by the Journal of Cancer Science & Therapy

Dear Madam/Sir,

I am writing this letter to state my support of the application for indexing in PubMed submitted by the Journal of Cancer Science & Therapy (JCST, ISSN 1948-5956). Since its first release in 2009, the JCST has made important progress and demonstrated a clear ability to maintain a consistent schedule for the timely release of regular issues as well as special mono-thematic issues. Currently in its volume 5, the JCST has published many articles of interest to scientists both in the United States and abroad.

The JCST has already satisfied the criteria to be indexed by a number of databases, such as CrossRef (which assigns a DOI to every published article), PubsHub, SCOPUS, Socolar, EBSCO, Chemical Abstracts, Index Copernicus, HINARI, and Scirus. In addition, a number of JCST papers reporting NIH-funded research have been published in PubMed Central.

By supporting the Bethesda Statement on Open Access Publishing, the Journal of Cancer Science & Therapy reaches a world wide audience and increases the visibility and impact of published work. The Journal of Cancer Science & Therapy follows the Creative Commons Attribution License and Scholars Open Access publishing policies, which permit anyone to copy, distribute, transmit and adapt the work provided the original work and source is appropriately cited. Consequently, by providing barrier-free access to the research literature, it greatly contributes to the progress in scientific and technical disciplines.

(contd.)

NCI
CCC

A Comprehensive Cancer Center Designated by the National Cancer Institute

I strongly endorse the Open Access publishing movement and support the application by the Journal of Cancer Science & Therapy for indexing in PubMed with the strongest possible enthusiasm and without reservation.

Please, do not hesitate to contact me if additional information regarding this matter were needed.

Sincerely,

A handwritten signature in black ink, appearing to read "Vicente Notario", enclosed within a large, loopy oval flourish.
